

# PT. MOLAY SATRYA INDONESIA

Protect the One Who Serves

## COMPANY OVERVIEW

PT. Molay Satrya Indonesia (MSI) is an Indonesian-incorporated defence and industrial group founded in 2009. The group's primary capability is the design, development, and procurement of field-grade tactical personal equipment engineered specifically for tropical and equatorial operational environments — conditions historically underserved by Western defence vendors.

Over sixteen years of active operations, MSI has expanded from a single tactical gear brand into an integrated group supplying Indonesia's Ministry of Defence, military special units, and law enforcement agencies — while maintaining a 50%+ domestic content (TKDN) ratio across all product lines. The same founding standards extend across all group subsidiaries, including hospitality and design ventures operating in Jakarta Selatan.
